

PRESS RELEASE

Capitalight Research is proud to announce the launch of its fifth and newest publication. Led by Patricia M. Mohr (bio below), the new monthly publication titled Critical Metals for a Sustainable World will deliver insights on copper, nickel, lithium, and rare earth elements. These metals will lead the decarbonization transformation of the global economy via battery technology and electrical infrastructure. Read the full press release [here](#).

June 30, 2021

Copper Prices Climb to New Heights

The inaugural issue of Critical Metals for a Sustainable World includes a detailed assessment of recent copper market developments and an 18-month price forecast. Copper is key for electrification and e-mobility. The report also assesses the outlook for nickel – in increasing demand in high-performance electric vehicle batteries – and the recovery in international lithium prices since late 2020. The recent price surge for 3 of the 17 Rare Earth Elements – neodymium, praseodymium and dysprosium – used in permanent magnets driving electric vehicle motors and for wind turbine generators – is also highlighted. **Click on the image above or the button below to read the full report.**

About Patricia Mohr

Ms. Mohr earned a Master's degree in Economics from The University of British Columbia and began her career with Natural Resources Canada followed by several years in corporate positions within the resource industry. She spent 31 years as an economist at Scotiabank, where she worked closely with the Corporate and Investment Banking groups, including the Mining team, with International Banking and with Global Risk Management. While at Scotiabank, Ms. Mohr developed the Scotiabank Commodity Price Index – the first Index designed to measure price trends for Canadian commodities in export markets. Patricia is a frequent speaker at international mining conferences such as China Mining in Tianjin and the Prospectors & Developers Association of Canada (PDAC) conference in Toronto.

Ms. Mohr is President of Mohr & Company Critical Metals Inc. of Vancouver and is a member of the Board of Directors of the Centre for Research and Innovation in the Bio-Economy (CRIBE). Patricia holds an Honours B.A. Degree and an M.A. Degree in Economics from the University of British Columbia. In 2021, Patricia was honoured to receive the 'Robert Elver Award in Mineral Economics' from the Canadian Institute of Mining, Metallurgy and Petroleum (CIM).

Our business model is subscription only, which leads to best quality work. This also allows us to follow the facts wherever they lead.

In addition to the reports, we offer 'research projects for hire' and 'white-label' publications.

If you have any questions which need answers, please email subscriptions@capitalightresearch.com.
